STATSPEC

[REDACTED]

1. The quantity requested under contract 10, i.e., so much per annum, leads to some confusion in view of the requirement of monthly deliveries and the fact that the contract is effective only after almost one-third of the fiscal year is past. It is not altogether clear whether we are obligated to take 1,800 rolls or 1,200 rolls. If these contracts are renewed, it is suggested that they indicate a maximum quantity from which we may obtain our requirements as needed. If the total quantity indicated in contracts nos. 9 and 10 is not ordered prior to the end of fiscal year 1949, it would be advisable to obtain releases from the contractors prior to executing new contracts for fiscal year 1950.
